Hi Budgap,

We've just dropped some powerful new features that make content creation at scale faster, smarter, and fully automated. Whether you're automating social media videos, or building a YouTube channel, this is for you.

Let's dive in 🗨️

📦 Bulk Create: Create Multiple Videos from a CSV

0%

0%

Need to create a lot of content—fast? [Bulk create](#) Bulk Create lets you generate multiple videos or audios at once using a single CSV.

✅ Perfect for:

- Social media automation
- Personalized marketing content

How it works:

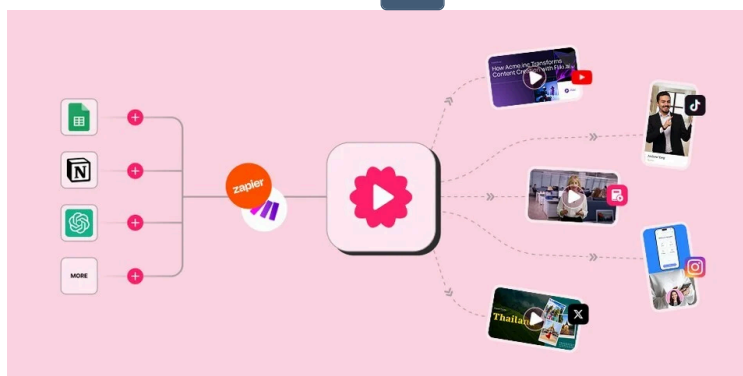

1. Click Bulk Create from the Files page
2. Upload a CSV with your content, voices, templates, and prompts
3. Hit submit — and done!

⚡ Designed for high-volume creators who need both speed and control.

Gmail - Scale Smarter: Bulk Video Creation, Automation, Editor Copilot and 50% Off!

🔗 Full Automation with Zapier & Make

0%

Say goodbye to manual uploads. Now you can connect Fliki to your favorite tools — like Google Sheets, Notion, and Calendars — and automate video creation from start to finish.

✅ Example use cases:

- New row in Google Sheets → Auto-generate a video
- New form submission → Create personalized onboarding audio
- Schedule → Auto-publish to social media

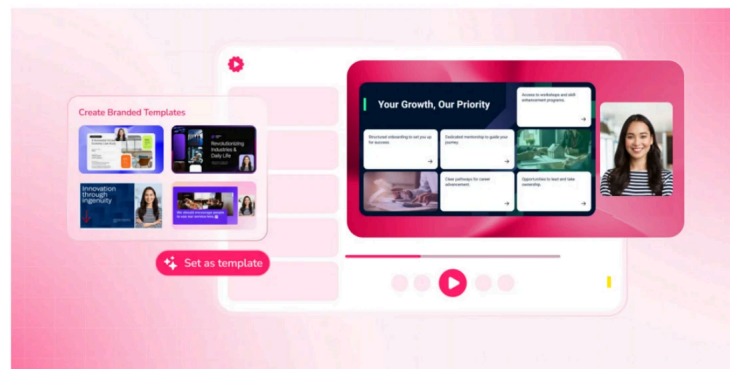

How it works:

1. Connect Fliki to Zapier/Make from the Automation
2. Set up your trigger and action
3. Let your workflows run hands-free

 Build once. Scale forever.

Custom Templates: Stay On-Brand Every Time.

0%

You can now create your own branded templates — and reuse them across projects. Perfect for teams who want consistency without extra effort.

How it works:

- Click the “More” icon on any file
- Select Convert to Template and hit Save
- Add scene keys and prompts

 Your brand, your voice — on every video.

Other updates at a glance

- Editor Copilot: Edit your video faster with AI-powered assistance
- Improved AI styling with more visually consistent scenes and image styles
- New Lite AI model enables faster, lighter video creation
- Create almost 2x more videos with the same credits
